II. READING: (2,0 marks)

A. Read the passage carefully, then circle the best answer: (1,0 m)

Coal, oil and natural gas supply modern civilization with most of its power. However, not only are supplies of these fuels limited, but they are a major source of pollution. Therefore, it's important to improve, explore and develop such alternatives energy sources as nuclear, water, solar and wind power. Each of these alternatives, however, has advantages and disadvantages.

Nuclear power plants efficiently produce large amounts of electricity without polluting the atmosphere; however, they are costly to build and maintain, and they create the difficult problem of what to do with nuclear waste. Hydroelectric power is inexpensive and environmentally safe, but impractical for communities located far from moving water. Wind power is a pollution – free source of renewable energy but it can't be used in many parts of the world where there is insufficient wind. Solar power is renewable, it does not cause pollution and it does not add the earth's heat load. However, it is difficult to collect and store. Solar power also requires expensive equipment.

B. There are four mistakes in the following passage, write down the mistakes and then correct them. The first one is done for you: (0,6m)

My husband and I *have* a problem about our holiday last year. I wanted to have a “lazy seaside holiday” because I was tired and need to relax. I loved lying in the sun, drinking iced beer and reading a good book. But Robert liked busy, culture holidays. He liked visiting museums and art galleries. He hated sunbathing because he always went red, not brown. The travel agent tried to help us and suggested Greece. I said I’d love to sail to a quiet island, but of course Robert said he’d like to stay on Athens. It was easy deciding what to do – we flew to Athens together, Robert stayed there and I traveled to the island of Kos.
